

155 SMOKE WP M110A2

This projectile is for use in most of 155 mm howitzers. Used for producing smoke screens and signals with a limited incendiary effect.

When the impact of the projectile on the target, the fuze detonates the incendiary charge producing the rupture of the projectile and dispersing the white phosphorous. A tight smoke cloud for occultation on earth is produced.

TECHNICAL CHARACTERISTIC

PROJECTILE		PRESENTATION OF THE PRODUCT	
Type:	Smoke WP	8 projectiles with grommet and lifting plug in a wooden pallet.	
Model:	M110	Pallet with 8 projectiles: <ul style="list-style-type: none"> • Weight: 352 kg • Length: 740 mm • Width: 370 mm • Height: 850 mm • Volume: 0.188 m³ 	
Body:	Steel		
Length:	680 mm (with lifting plug)		
Fragmentation C.:	0.19 kg Comp B		
Smoke Charge:	Weight 7.07 kg WP		
Marks:	Light green, red band, yellow marks		
Mass:	42.3 ÷ 44.9 kg (depending on the weight zones)		
		CLASSIFICATION	
		UN No.:	0245
		Group:	1.2 H
